David Lass
 aquarium product reviewer from
 "In The Fish Room"
 March 2010, FishChannel.com:

The results are in! Tested. Passed!

"I asked a few local fish stores that I know and trust to test Herbtana for me. They did this over a period of about six weeks, using Herbtana both as a dip for receiving fishes and for treating marine ich."

"As a dip for receiving fishes, Herbtana worked exceptionally well. The treated fishes were all very healthy and active once released into the store tanks."

"As a cure for marine ich, Herbtana worked in all cases." One store owner said "I saved 90 percent of the infected fish, and it took exactly 10 days to cure them."

"Herbtana cured a hippo tang that came down with ich (they do that a lot)....without harming the invertebrates in the tank."

Reef Safe

"Herbtana clearly does stimulate the natural immune system of fishes, and it does it without using any harsh chemicals or drugs. It takes between five and ten days for a cure to work, but Herbtana does so using natural ingredients and in a manner that does not stress fishes."

Herbtana, In Demand!

Tina T. Hammond & Laurie Davenport
 Guppy Tales
 From an “emergency”
 e-mail to Ecological Labs,
 January 10, 2010:

“We are out of Herbtana and need it as soon as possible, so we are willing to pay the difference in freight if you are able to send it overnight...”

“We have been using the products for all the tanks and our death rate has dropped even more dramatically than last time. This product is wonderful! We are up to 54 tanks and planning to add a couple more 55 gal.’s to the showroom...”

“We are out of Herbtana and need it as soon as possible, so we are willing to pay the difference in freight if you are able to send it overnight. We are open 7 days a week, so Saturday delivery works okay with us. We have been using the products for all the tanks and our death rate has dropped even more dramatically than last time. This product is wonderful! We are up to 54 tanks and planning to add a couple more 55 gal.’s to the showroom. Your product is awesome!!!

Reef Safe

MICROBE-LIFT/Herbtana supports the fish’s natural immune system, driving off the excess parasites. Since they cannot return to the fish during treatment, the majority of the parasites will starve without a host.
